

Burnham Building

Millennium Tower – Boston, MA

- TYPE
Commercial
- SIZE
20,000 sq. ft.
- COMPLETION
November 2014

Located in the heart of Downtown Crossing, this roof is part of the transformation and preservation of an iconic Boston building.

The Burnham Building was the last major project of acclaimed architect and urban planner, Daniel Burnham. The building is recognized as a historic landmark by the Boston Landmark Commission, and is listed in the National Register of Historic Places.

Newly revitalized and incorporated into the Millennium Tower development in Boston’s Downtown Crossing, the Burnham Building incorporates several sustainable strategies that exemplify environmental adaptive reuse.

Recover installed a half-acre, multi-level, sedum green roof that meets stringent wind uplift standards, provides stormwater management for the building, and creates beautiful green views for the adjacent offices and apartments.

Top left to right Recover installed sedum mats on the ninth and eleventh floors of the historic Burnham Building in Downtown Crossing / Varieties of sedum flower yellow and pink in the summer, attracting honey bees, even in the heart of the city
