Zinco USA

Planter Components
Tournesol Siteworks

Plant Supplier
Cavichio Greenhouses

Soil Media Supplier
Read Custom Soil

Recover transformed a large entertainment patio into a vibrant lounge space and outdoor kitchen area with floral views on all sides.

Large planters filled with lightweight green roof media and custom uplit tuteurs anchor the lounge space and help trailing perennials grow, while clusters of small planters make space for smaller sitting areas. A diverse plant palette of flowering annuals and perennials adds color and texture to the patio, and an irrigation controller ensures efficient watering for optimum plant health.

Top left to bottom right: Large planters with uplit tuteurs anchor lounge space / Clusters of small planters make sitting nooks on the side patio / Drip-irrigation ensures efficient watering for optimum plant health
